

Terminals Mobilisation Engineer, Strategic Programmes

COMPANY: e2E SERVICES LTD.
JOB REF: RES.065
TYPE OF ROLE: PERMANENT
LOCATION: WILTSHIRE (UK) (Possibility for some remote working)

Our Company

e2E has been at the forefront of innovation in the space sector, specialising in satellite communications, for two decades, offering to all our world-wide stakeholders unrivalled expertise to design, develop and operate state-of-the-art solutions and systems. Our portfolio of consultancy services and technology know-how covers the entire spectrum of any satellite communication project, from market opportunity sizing and end-user requirements down to ground network development and operations. To both commercial and defence related domains, we also offer unique modular and agile technology to enable a more user-friendly and accessible use of satellite communication resources.

Innovation and ingenuity are the guiding principles of anything we do for our customers. Working with e2E requires a high level of dedication and personal motivation, commitment and a drive to continually seek to strive to improve – and the results consistently achieved over the years, at both personal and team levels, are outstanding and make e2E a great place to work.

Job Description

Will be part of a team responsible for the engineering management and operational support for remote and deployable Satellite Terminals used to deliver communications services to UK military and government personnel. The set of Terminals is diverse and includes commercial land terminals accessing L, Ka and Ku Bands, military maritime terminals accessing X Band and commercial maritime terminals.

The consortium will acquire the responsibility for engineering management and operational support for remote and deployable Satellite Terminals from an incumbent contractor. The Terminals

Agility in Communications

Terminals Mobilisation Engineer, Strategic Programmes

Mobilisation Engineer will support the technical tasks as part of the mobilisation team, and with a particular focus on assuring the accuracy of information being passed over by the incumbent, including quality and completeness of technical data and the condition of operational equipment.

Tasks will include:

- Supporting the Terminals Mobilisation Manager and SME (the Team Lead) in planning 'due diligence' activities.
- Supporting the Terminals Mobilisation Manager in planning migration activities and carrying them out with suitable progress reporting to the Team Lead.
- Assess and thereby assure the quality of the incumbent contractor's Terminals-related data.
- Identify and report on any deltas or gaps in the data and feed back into the due diligence activity planning.
- Establish relationships with the incumbent's team of Terminals engineers.
- Collaborate with key sub-contractors to carry out logistics inspections, audit and report on the condition of deployed and stored maritime terminals.
- Carry out Logistics inspections audits and report on the condition of extant commercial terminals used by the incumbent.
- Carry out shadowing and inspection of the Incumbent's operations including for terminals testing and training.
- Carry out an audit of the Incumbent's Terminals test results as part of the assessment of Terminals condition.

Key Responsibilities

Provide technical and operational assessments, with analytical and operational skills for the domain of commercial and military satellite communication terminals.

Skills, Character and Experience

Essential

- At least 8 years' experience in satellite services and in particular satellite RF communications and terminals.
- Analytical skills to systematically plan and carry out evaluation of Terminals' and operational data.
- Ability to engage productively with multi-disciplinary engineering teams during business change.
- Experience of service operations support and engineering lifecycles.
- Well organised with the ability to multi-task.
- Ability to remain positive in high pressure and stressful situations.
- Collaborative mind-set and strong interpersonal skills.
- Critical thinking, communication, and relationship-building skills.
- Must be a UK national.

Terminals Mobilisation Engineer, Strategic Programmes

- Must be able to achieve SC

Desirable

- University degree in Electrical/Mechanical Engineering, Computer Science or equivalent qualification.
- Experience in programme planning, budgeting, risk management and strategy development.

Salary

- Attractive compensation package dependent on skills/experience.
- Growing list of Company benefits.
- By submitting your CV/application you are consenting to e2E Group using and storing information about you for monitoring purposes relating to your application of future employment. This information will only be used by e2E Group.
